## EXPERIENCE
*Thinkful*                                                                                                      Online
**Engineering Program**                                                          02/2023 – 12/2023
- Learned industry best practices and software development standards with a focus on HTML5, CSS3, Javascript, React Native, Node.js, PostgreSQL, RESTful API's, algorithms, and data structures.
- Developed and deployed mobile-first applications while learning new languages and frameworks, spending several hours per week collaborating with and learning from senior web developers in a mentor-student relationship.
- Produced professional projects from concept to completion including:
  - *[Workout Tracking App](#)* | Developed and implemented a frontend application for Powerhouse Fitness, facilitating efficient tracking and management of client data, with connectivity to a backend server and database. Utilized CRUD operations and incorporated a search history component for enhanced user experience and accessibility of previous client exercises and details.
  - *[Recipe Tracking App](#)* | Created a user-friendly interface for users to input recipe details. Implemented efficient recipe functionalities allowing users to view and delete the recipes that have been created.
  - *[Periodic Tables Reservation](#)* | Designed frontend and backend functionalities to allow users to create reservations, seat customers, search future reservations and complete reservations.

*Powerhouse Fitness NC*                                                             Burlington, NC
**Owner**                                                                              12/2021–Present
- Led cross-functional teams to achieve project milestones, demonstrating effective leadership and team collaboration.
- Successfully organized and executed projects and work plans, ensuring timely completion.
- Adapted to the unique needs of customers, exhibiting commitment to ongoing learning and customer satisfaction.

## EDUCATION
*Thinkful*                                                                                                    Remote
**Certificate, Engineering**                                                                  12/2023
- Acquired comprehensive knowledge of industry best practices and software development standards, focusing on JavaScript, HTML5, CSS3, React Native, Node.js, PostgreSQL, RESTful APIs, algorithms, and data structures.
- Demonstrated growth by successfully developing and launching mobile-first applications, actively engaging with senior web developers in a mentor-student relationship to expand language proficiency and framework expertise.
